

The Aerospace Corporation

Emergency Procedures Quick Reference Guide

AeroEAlert Notifications

Aerospace uses a notification system to notify and instruct employees in the event of an emergency. These notifications are delivered as email, text and voice. Employees can select the devices in the priority selected to receive these notifications. Ensure your contact information is up-to-date in [AeroEAlert](#).

Non-Aerospace personnel will be able to sign up to receive Aerospace AeroEAlerts soon. Continue to follow emergency procedures as instructed through the PA system and/or security and safety personnel.
