Emergency Procedures Quick Reference Guide

Chemical and Airborne Incidents

IN CASE OF A CHEMICAL OR AIRBORNE INCIDENT:

- Immediately report the incident to 911
 - If you have information on the incident, provide it to the emergency responders
- Secure the area and **DO NOT** attempt to clean unless you are properly trained, equipped, and you understand the chemical characteristics of the material
- Follow procedures as directed by emergency personnel
- You may be instructed to evacuate or to shelter in place
