Emergency Procedures Quick Reference Guide

Severe Weather

IN THE EVENT OF SEVERE WEATHER:

There are two types of Severe Weather Alerts

- **Watch** - Public notification that weather conditions exist that could lead to a warning.
- **Warning** - An alert from the National Weather Service confirming the occurrence of a severe weather event and the time, location, speed and direction of movement.
- If severe weather is imminent
 - Remain alert and listen to the radio or television for further developments
 - Be familiar where the safest place within your home or office are located
 - when ice and snow impact the operations, the site lead my suspend or delay opening your site. An AeroEAlert will be sent to all site employees with instructions
